Restoring files

Plug in Clickfree to your computer. When Clickfree starts and you see the Welcome screen, click on the Restore/Transfer.

Troubleshooting

Didn't start automatically?

1. Try unplugging Clickfree and plugging it back in.

Still didn't start?

If Clickfree hasn't started automatically there must be something on your computer that is blocking Clickfree. Please follow these steps:

1. Plug in Clickfree to your computer.
2. Click on the Windows Start button, click "My Computer" (Windows XP & 2000) or "Computer" (Windows Vista, 7).
3. Locate "ClickFree_System". Right click on "ClickFree_System" and select "Explore".
4. Double click "FixMyClickFreeBackup".

This should repair your problem.

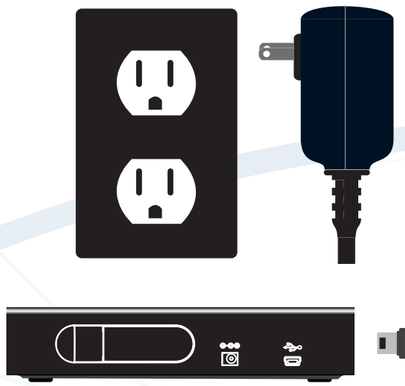
Automatic Backup

Quick Start Guide

C2N Network Backup Drive

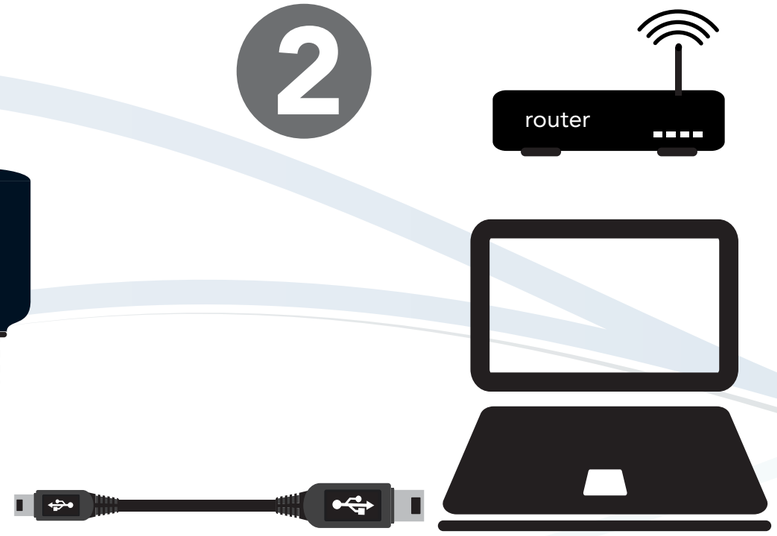
Backing up with Clickfree is easy

1



Plug in the AC adapter to a power outlet and to Clickfree.

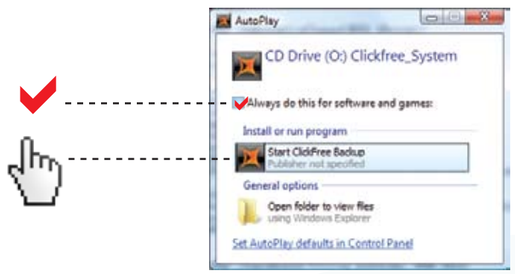
2



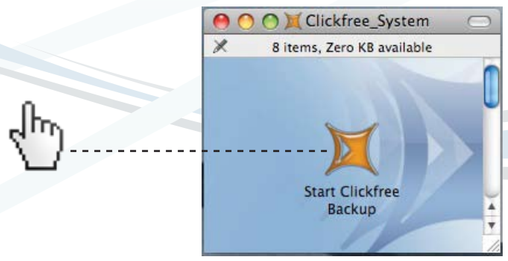
Connect the USB cable to Clickfree and to your computer. Wait for up to 60 seconds. The Clickfree backup program will start automatically.

60s

Windows Vista & 7:



Mac:



The first time you connect a Clickfree device, these windows may appear.

3

To backup another computer linked to the same router, plug in the Setup Key to one of its USB ports.

After BackupLink auto setup is complete, remove the Setup Key and repeat for other computers you want to back up.

NOTE: Clickfree must remain plugged in to a computer that is on and linked to the router.
